# ABOUT US

Booming Bridge Group is a international supplier of wood materials of furniture. Head office located in Qingdao city. Qingdao is an international port city, and Qingdao Port is a global hub port for containers and bulk cargo, with very convenient sea, land and air transportation. We have two production bases, located in Deqing city and Linyi city respectively.

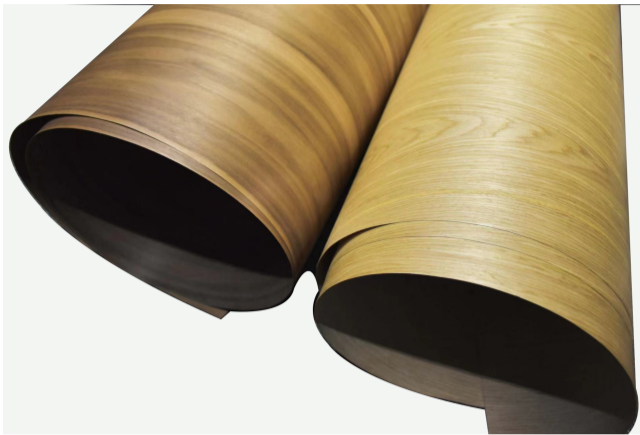

We are an international supplier of FSC–certified wood materials of furniture. Our product range includes Fleece backed Veneer Sheets, Spliced Veneer Sheets, Sliced Veneers, Veneered Panels, Melamine laminated boards, PET laminated boards, Large Film faced plywood, Large plywood. Trusted by clients in furniture, door, home decoration and board manufacturing industries for over 20 years.

At currently, In addition to supplying the domestic market, we also export to Europe, North America, South America, Middle East, Southeast Asia, South Asia and East Asia.

We pride ourselves in offering outstanding customer service and reliability. We are well respected in the industry and exhibit at all the major trade shows.

## PRE-FINISHED FACES

Pre-Finished Faces is a nano-polymer coated veneer that changes the future of wood veneer. After impregnated with nano-polymer resin, the surface of the veneer forms a protective layer with zero skin feeling through hot pressing, shaping and other processes. No need to make any paint on veneer surface. Pre-Finished Faces projects for furniture, automotive and other applications. Using Pre-Finished Faces allows designers to create distinctive new

products that are lightweight, comfortable, elegant and stable, cost less to produce and are very environmentally friendly.

Available Size	
Length	1850mm, 2150mm, 2500mm, 3050mm...
Width	610mm, 920mm, 1250mm...
Thichness	0.2mm, 0.4mm 0.5mm, 1.0mm, 1.5mm...
We offer different size by order in length, width and thickness.	

## FLEECE BACKED FACES

Fleece Backed Faces offer the highly decorative veneers with a durable and flexible backing. The ultra-flexible veneer is bonded to the fleece backing making the veneer easier to apply to any chosen substrate. It is easy to cut down to any required size or shape and the veneers thin structure gives the flexibility to the sheet which allows it mould around curves and other tricky orientations.

Available Size	
Length	1850mm, 2150mm, 2500mm, 3050mm..
Width	610mm, 920mm, 1250mm..
Thichness	0.2mm, 0.4mm 0.5mm, 1.0mm, 1.5mm...
We offer different size by order in length, width and thickness.	

## SPLICED VENEER SHEETS

Besides high-quality standard veneers, Booming Bridge also provides customers with spliced veneer faces. Our specialty is custom-made, high-quality, challenging products with an emphasis on North American and European veneer. We can accept small to large quantities, and Booming Bridge's spliced surfaces are available in a variety of styles and grades thanks to our reliable supply of veneers.

Available Size	
Length	Up to 3200mm
Width	Up to 2000mm
Thickness	0.4mm, 0.5mm, 0.6mm, 1.0mm, 1.5mm...
We offer different size by order in length, width and thickness.	

## STANDARD VENEERS

Booming Bridge Veneer offers a wide range of natural veneers made from the world's major hardwood species. We are able to provide a variety of grades and sizes of veneer in consistent colors to meet the needs of a variety of different types of customers. With Booming Bridge, customers benefit from higher manufacturing yields, reduced working capital requirements, and the confidence of working with a partner committed to sustainable practices.

Available Size	
Length	Natural
Width	Natural
Thickness	0.4mm, 0.5mm, 1.0mm, 1.5mm, 2.0mm...

## VENEER EDGING

Booming Bridge also provides customers with veneer edging, it is a great way to cover the exposed edge of veneered MDF and other boards. It gives a realistic looking solid wood finish which can be used in a variety of applications, from worktops to cabinets.

All our edging is made from high quality veneer with invisible finger joints. We use different types of backing for ease of application.

We have many different types of edging available:

Solid Wood Veneer Edging, Pre-Finished Veneer Edging,

Our normal thick including 0.4mm, 0.8mm, 1.2mm, and we can supply in any thickness - from 0.3mm (single layer) up to a maximum of 2mm thick.

We stock edging in 16mm, 19mm, 20mm, 22mm, 23mm, 25mm widths and we can also manufacture bespoke sizes upon request - any species in any width between 16mm and 200mm.

## VENEERED PANELS

Booming Bridge range of veneered boards are made from veneers (including Sliced veneers and Rotary veneers) pressed onto wooden boards of different types, such as MDF, Chipboard, Block Board, OSB and Plywood.

The resulting veneered board is an excellent and cost effective alternative to solid wood and is suitable for a wide range of uses, including wall panelling and furniture making.

Technical Index	
Face/Back	Natural Veneers
Core	MDF, Plywood, Block board, Chipboard, OSB
Glue	MR glue, Phenolic glue, E0, E1, CARB
Size	910x1830mm, 1220x2440mm...
Thickness	2mm-30mm
We offer different size by order in length, width and thickness.	

# MELAMINE LAMINATED BOARDS

Booming bridge range of melamine faced boards are made from melamine paper pressed onto wooden boards of different types, such as MDF, Chipboard, Block Board, OSB and Plywood. The resulting melamine board is an excellent and cost effective alternative to solid wood and is suitable for a wide range of uses, including wall panelling and furniture making.

Technical Index	
Face/Back	Melamine paper
Core	MDF, Plywood, Block board, Chipboard, OSB
Glue	E0, E1, Carber
Size	1220x2440mm
Thichness	2.5mm, 3mm, 6mm, 9mm, 12mm, 15mm, 18mm
We offer different size by order in length, width and thickness.	

# PET LAMINATED BOARDS

Booming bridge range of PET laminated board are made from PET film pressed onto melamine wooden boards of different types, such as MDF, Chipboard, OSB. The resulting PET board is suitable for doors of furniture making and wall panelling. PET board has the obvious advantages of no fading, no discoloration, pressure resistance, impact resistance, high temperature resistance, corrosion resistance, aging resistance, easy cleaning, etc. PET board does not burst during processing, and rarely collapses.

Technical Index	
Face/Back	Face: PET Film, Back: Melamine paper
Core	MDF, Plywood, Block board, Chipboard, OSB
Glue	E0, E1, CARB
Length	1220x2440mm
Thichness	12mm, 15mm, 18mm
We offer different size by order in length, width and thickness.	

# LARGE FILM FACED PLYWOOD

Film faced plywood is the special plywood with two sides coated with wearable and water proof film. The film is adhesive impregnated paper. The function of the film is to protect the inside wood from moisture, water, weather and extend the plywood's service life. Film faced plywood can be used in harsh and outside environment: shuttering plywood, formwork plywood, concrete formwork, floorboard, vehicle building.

Technical Index	
Film color	Brown, Black
Core	Birch, poplar, Eucalyptus, hardwood...
Glue	MR glue, Phenolic glue, E0, E1, CARB
Size	1220x2440mm, 1250x2500mm, 1525x2440mm, 1525x3050mm, 1950x3240mm...
Thichness	6-40mm
We offer different size by order in length, width and thickness.	

# LARGE PLYWOOD

In addition to normal size plywood, we can also provide users with special-size plywood, according to the needs of users to produce large size plywood they need. We have complete production equipment and production process to meet the needs of customers for oversized plywood. Such as Birch plywood, poplar plywood, hardwood plywood..., we also supply fireproof plywood and waterproof plywood.

Technical Index	
Face/Back	Rotary veneers
Core	Birch, poplar, Eucalyptus, hardwood...
Glue	MR glue, Phenolic glue, E0, E1, CARB
Size	1220x2440mm, 1250x2500mm, 1220x4200mm, 1525x2440mm, 1525x3050mm, 1950x3240mm
Thichness	3mm-40mm
We offer different size by order in length, width and thickness.
